COMMUNITY OUTREACH

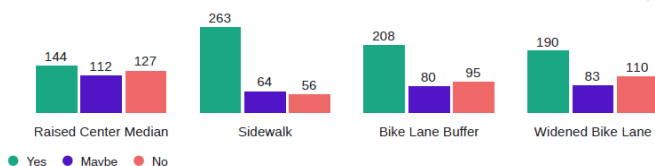

An electronic survey was distributed in effort to obtain general public sentiment where 85% shows support of pursuing grant opportunities for the proposed improvements along Harbor Blvd.

In addition, staff presented the project to the Active Transportation Committee, Transportation and Circulation Commission and Infrastructure and Natural Resources Advisory Committee. All generally support pursuit of the grant and proposed project improvements.

Yes [85%]

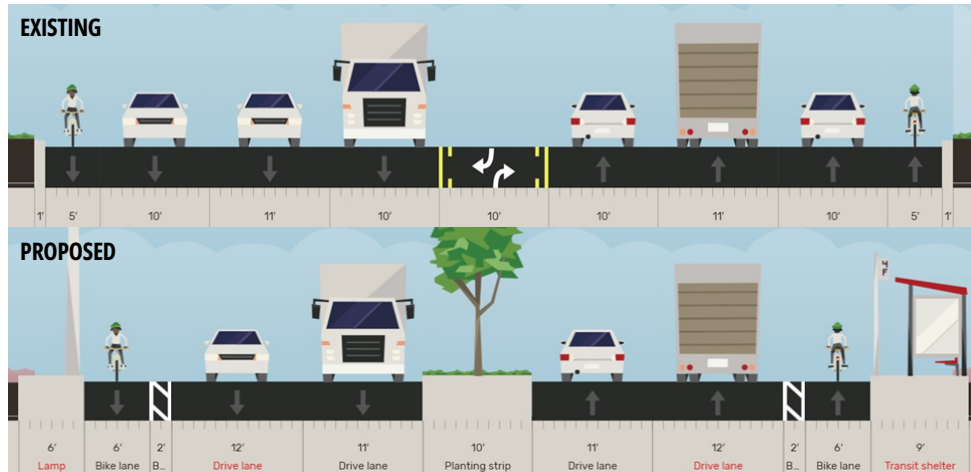

SHOULD THE FOLLOWING FEATURES BE PRIORITIZED IF A LANE REDUCTION IS INTRODUCED?

PROJECT SCOPE

The proposed project includes lane reduction (6-lane to 4-lane), enhanced bikeways (buffered Class II bike lanes and Class IV bikeways) and continuous sidewalk on both sides of Harbor Boulevard. A new signalized intersection is proposed at the Brea Dam Park entrance which will facilitate cyclists traversing the Fullerton Loop (local mountain bike trail). The project also includes enhanced transit stops, ADA upgrades, new street lighting, new center medians, drought tolerant landscape, and other complete streets features.
