Welcome

The Redistricting Process

The City of Fullerton seeks your help to plan and draw new City Council Voting Districts.

Local governments use updated Census data to redraw voting district line every ten years to reflect changes in the local population. State law requires cities to engage the community in the redistricting process by holding public hearings and conducting public outreach, including to underrepresented and non-English speaking communities.

The final map created through the Redistrict Fullerton process will define Fullerton's City Council district boundaries for the next ten years. The public has many opportunities to participate in redistricting and we invite you to get involved!
